psp 300r The server is running and has been up for over 3 months, with only the user 'root' on the ssh password login. I can also see the ppt file on the server, but when I try to open it, I get a 'file not found' error. The user is the owner of the file. A normal user on the same server can open the file using the gui on the ubuntu machine, so its not a permission issue. I've tried to move the file to another directory, but I can't seem to find the right directory. Can anyone give any ideas as to what I could try? EDIT: I should add that all the files I have written to the server are owned by the user 'root'. A: From the error message that I see, it looks like the file isn't where it's supposed to be. Have you tried logging in to the server via ssh? If not, you can do that from another computer with some work. Otherwise, the simplest way is to pull the entire server to another computer and do the work there. Once you're done, rsync the files back to the server. If you need a tutorial on how to do that, I'd recommend this as a starting point. 8 Common Java Tips So, you want to learn Java. It's a noble goal! But you don't want to just learn how to program, you want to go on a learning journey. So, you're feeling lost. You're not sure where to start. You want to know what you should be learning. But how do you know what to focus on and what is the best way to learn? Here are 8 common Java tips. 1. Why Java? The most important question that should be answered. When you're first learning, you're going to want to spend time getting into the Java syntax, learning how to work with objects and arrays, understand how variables work and what the difference is between an array and a list. This is important stuff. But Java is more than just learning how to code. You should be thinking about what type of applications you're going to be creating. You want to learn more about the design pattern, learn what object orientation is and learn how to better organize your code. Java is the language of choice for mobile apps. 82157476af
