About This Game

Spiral Splatter is a brain-bending arcade puzzle game that will push your hand-eye coordination to the limit with nonstop, mind-boggling puzzles!

Put your problem-solving skills to the test as you navigate over 100 levels and 11 different stages full of perplexing puzzles. Watch out for moving obstacles as you maneuver through each level. Think fast, if you're too slow, the ghost may catch up to you. Hustle to reach the finish before your time is up!

Each stage of gameplay adds a new challenge with an ever-increasing difficulty. Don't be fooled by appearances, Spiral Splatter will stump even the most adept puzzle game aficionado.

Stay calm, relax and see if you can take on Spiral Splatter!

Features:

- Over 100 Levels of gameplay
- 11 unique stages with a new challenge on each one
 - Colorful and clean graphics
 - Challenging gameplay
- Full in-game controller support

Title: Spiral Splatter
Genre: Casual, Indie
Developer:
Neonchimp Games

A reasonably standard tower defence game that happens to be in VR. There are a bunch of levels in a campaign that tells a story.. An amazing game for adults and kids alike.

I played all Skylanders games on console and had about 80% of the toys for it and that was very expensive but with Disney Infinity 1.0, 2.0, 3.0: Gold Editions you get the game and all the toys unlocked.

Pros.

*Lots to do

*Good graphics

*Fantastic Toybox Mode

Cons.

*Can be a grind to Level every character

*Price on Steam is a little high. This game is unplayable in it's current state.

Really obvious things like the tutorial doesn't work because you don't start with money.

Also it is possible to hit a dead end in sandbox mode because there is a bug that won't let you place machines.

The game has promise. It could be a different take on Factorio but since the dev is make these really simple mistakes I doubt the game will ever get finished.. Good game, can't wait to see what the final release looks like.. The biggest flaw Kingpin had is that it was ahead of it's time. Realistic backalley fights, weapon upgrades, thug recruitment, interaction with NPCs, different urban locations to dominate and an unforgettable atmosphere... If you like dark, urban games and can put up with foul-mouth characters and over the top violence, then Kingpin: Life of Crime offers an experience worth engaging.. I think this is my first review ever, maybe second. I have 60 vive games, and none of them have me as excited as this game. I just flew around the city, and with the guns and ranking, I imagine this is going to become a multiplayer of epic proportions. Hopefully there will be upgraded guns, leveling, new skills, upgraded wings and jets, etc. This is very fun just zooming around with no one else there. I imagine an MMO for this game will be the best experience on the vive hands down.

Terrible UXUI. Terrible voice acting.. Controls are terrible and there are spots where you get stuck and have to start from the beginning. Would be fun with better controls.. i LOVED this game back in the days - couldnt make it to the end because of the well known bug in the queens hive. Watched the ending in 2016 and its glorious.

Thank you for this game, its one of my nicest childhood memories.. Third room still to go but definetly worth the money. One small con is that items may be lost for good some times. Had to restart the first room once because of that.. One of the best VR games I've seen so far.. 4, мало

Короткая, но интересная.. I played the demo quite a bit longer than an hour, but I only just purchased the game, so it only says an hour. Anyway, this is a puzzle type game in the style of Portal, where you run around in First Person View Mode solving puzzles in the environment with what I call a 'Themed Mechanic'. In Portal, the Mechanic was, obviously, portals made with the portal gun. In Sandmason, it's dirt if said in its simplest form. You have a can that can dig and store dirt from the environment, and then be placed down again in the form of spheres made of dirt. You use this to reach places n' stuff. Along with various puzzles involving moving to places, there are ones where you need to help get a ball shaped power source to a socket, and also contend with giant slime creatures and get creative when avoiding\killing them.

There are various power ups too, like jetpacks and super speed that are fun to use.

It's a very fun game, and there's also a demo, so try it out. I recommend it.
