## Financial Modeling Fundamentals

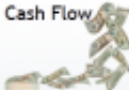

In this course, you'll learn the fundamental financial modeling and technical skills you need to ace your interviews and to gain a big advantage once you start working.

We'll start with Accounting 101, and then teach you how to create 3-statement projections, common valuation metrics and multiples, and how to value a company using public company comparables, precedent transactions, and a DCF.

Finally, you'll learn how to create a merger model and LBO model and how to answer related interview questions.
